

Features & benefits

Simple installation

- Boltless mounting for quick and easy installation and rotation

Wavy Lock design

- Prevents rule insertion in the seam and ensures tight and solid closure

Flexible, durable and safe

- Lightweight molded fiberglass backing prevents damage and injuries

High performance dynamics

- High resilience to wear, uniform wear pattern, stable durometer

Rapid delivery and support

- Always in stock and supported by a team of technical consultants

REVO^{XD}

Anvil Covers

DURABILITY AND PERFORMANCE

Revo-XD[®] high performance anvil covers are made from advanced elastomeric polyurethane and are specifically designed for demanding production lines. They are available in a range of sizes, thicknesses and are custom fitted to each press.

Offering superior impact, abrasion and tear resistance, they provide the highest quality field-proven converting under a wide range of conditions. Revo-XD[®] anvil covers are easily installed and rotated for an extended life cycle.

With moulding and machining capabilities in the same facility, Proden is able to provide efficient adjustments and custom development for specific applications.
