

Features & benefits

Wide range of profiles

- Offering multiple scoring solutions

Reverse Score™

- Enables reverse scoring on SW and DW materials

Twin Score™

- Replaces double scores from 1/8" to 5/16"

Matrix Score™

- Reproduces matrix effect on laminated board (label)

Specialty Score

- Can be modified to combine perf rule

JoncoScore™

INNOVATIVE SCORING

The patented JoncoScore™ provides rotary scoring capabilities that were exclusive to flat die cutting until its introduction.

With a range of specially designed profiles, this unique scoring technology can be used on most types of single and double wall corrugated material.

Reverse scores, roll over scores, precision scores can be done with and across corrugation with accuracy and excellent definition.

JoncoScore™ has also proven very effective with full laminated sheets by eliminating most liner cracking.
